HEAT RECOVERY UNITS (HRU) WEATHERPROOF OR ACOUSTIC ENCLOSURES

If your application requires a typical standard small HRU, however you don't have the space internally then we will enclose within a weatherproof pentapost enclosure. Alternatively, in a noise sensitive application we can install an enclosure to provide greater acoustic properties.

TYPICAL APPLICATIONS

- ▶ Weatherproof / externally mounted
- ▶ Sound proofing
- ▶ Multiple stacked units (internal or external) for space saving design

FEATURES

- ▶ No limitations on arrangement / layout
- ▶ All HRU models / manufacturers catered for
- ▶ Circular spigots
- ▶ Fully bespoke to suit all types and models of HRU
- ▶ Fast turnaround / delivery
- ▶ Weather louvres for external applications
- ▶ Fully accessible removable side panels
- ▶ A full range of available external finishes (Goosewing grey plastisol as standard)
- ▶ Various panel thicknesses and types of panel infill available
- ▶ Cost effective solution compared to equivalent purpose built weatherproof units
- ▶ Cheaper than the HRU manufacturers weatherproof option
